

I am vehemently opposed to the FCC's purported desire to relax the rules concerning broadcast multiple ownership. This Administration and its agency heads do not represent the desires of the American public. Our country's forefathers would be sickened by the obvious corporate greed that has a stranglehold on this nation's public policy decision-making. The Bush Administration and the FCC will go down in history as having prostituted their responsibility to serve the public in favor of power and the almighty buck! Shame, shame on all of you.
